Summary

Backend Engineer skilled in building scalable MERN applications with strong foundations in Data Structures and Algorithms (300+ problems). Experience in designing real-time systems, secure APIs, and concurrent data processing. GATE 2026 qualified, focused on high-performance backend systems.

Technical Skills

Languages: Python, C++, JavaScript

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React.js, Tailwind CSS

Databases: MongoDB, MySQL

Tools: Docker, Git, Postman

Core CS: DSA, OOP, DBMS, OS, Computer Networks

Projects

KheloCricket — Real-Time Cricket Analytics Platform

MERN Stack

- Built a scalable backend supporting real-time match tracking and tournament management.
- Designed REST APIs with JWT authentication and role-based access control.
- Implemented concurrent update handling for live score processing with consistent data flow.
- Optimized API performance and database queries to improve response time and scalability.

Smart Local Services Platform

MERN Stack

- Developed a full-stack platform connecting users with verified service providers.
- Built role-based dashboards (admin, provider, customer) with secure authentication.
- Implemented booking workflows, filtering, and approval systems for service management.
- Integrated real-time chat (Socket.io) and payment gateways (Razorpay/Stripe).

Achievements

- GATE 2026 Qualified (Computer Science).
- Solved 300+ DSA problems on LeetCode and GeeksforGeeks.
- Finalist — CodeWar 2.0 Hackathon (Top 10/150+ teams).
- HackerRank Python Certification — Top 10%.

Education

B.Tech, Computer Science and Engineering

Dr. A.P.J. Abdul Kalam Technical University

2025
